THE GRANT MONUMENT FUNDS.

The San Francisco Association to erect a monument to the memory of General Grant in that city is moving at last in the direction of collecting funds. We sincerely wish it full success. San Francisco should erect a great monument to the foremost man of the age, that the memory of his deeds and words may be everlasting re-called by the monumental pile. But while San Francisco surely will have a monument befitting her dignity and character, the people must not forget the State Grant Monument scheme. It was the first in the field. It was before the people prior to any movement in San Francisco having taken form. It is to work out its results through the mite contributions of the people. It will be essentially the people's monument, and the people's tribute to the departed hero. Whoever becomes a member of the Association has forever an undivided interest in the common pride that should be felt by all in this great work.

The Association is not localized. It is as broad as is the State, and as unselfish as any human work that was ever planned. There is no man or woman in health, and able and willing to work, who cannot give the asked for mite to the Society. In return, there is given to the giver a very handsome certificate of membership, which in itself is teaching, suggestive, historical and worthy of possession as a work of art.

There ought to be raised by this means a hundred thousand dollars. It would even then be representative of contributions of their people regarding the text-book reform, or are you to hinder, and burden and delay, and make so the people issuing of the new school books, that the people will sicken of the matter and consent to the scheme being dropped?

Pledges amount to but little, but the people need at least to know the expressed opinions of their candidates, since it is as certain as the sun shines, that the book syndicates and enemies of the State system will know their men and make no mistake about it.

It would seem that the people of Europe, in the blaze of the intelligence of the nine-teenth century, must sicken of the faces called council of the Powers, that are every now and then called to settle the question of the rule of a weak neighbor.

The comedy of a new congress on the Turkish question and the Roumelian imbroglio is to be repeated presently.

The time must come when the people will give their rulers warning that they have something to say when perchance shall be pre-served and territory be divided up, and will rise in their might and put an end to the interminable Turkish question. That Power would confer a favor upon mankind if it would cease to exist, and thus be no more the cause of constant agitation and misrule.

Riot in the Seattle Intelligencer when they blind and deaf? Hero has his news columns for some months past been dotted with items of the meetings, discussions and general proceedings of the First Cremation Society of San Francisco. The statement of the incorporation of a crematory joint stock Association within that society has also been the subject of frequent reference in the San Francisco press, and one of the leading members of the San Francisco bar, standing at its head, has with his Director, been diligent in selling the stock, and such progress has been made that but 27 shares remain to be taken, when the incinerating furnace will be at once put up. Certainly the Alta cannot have forgotten that a strong effort was made in the Legislature to pass a law legalizing cremation.

WAKE UP.

The San Francisco Alta, after noting the progression made by cremation in both theory and practice in other States and countries, and its usefulness and wisdom, remarks that there is "no organized movement" in this direction on the coast, and that hence there is here an opportunity for "an intelligent enterprise." Is the Alta editor blind and deaf? Hero has his news columns for some months past been dotted with items of the meetings, discussions and general proceedings of the First Cremation Society of San Francisco. The statement

Certainly the Alta cannot have forgotten that a strong effort was made in the Legislature to pass a law legalizing cremation.

It is now clear that Dr. Ferran's system of inoculation for cholera is a fraud. It has not checked the plague in southern Europe, and has had no visible effect in Spain, where it has been most practiced.

DESTRUCTION BY FIRE.

IN THE OUTSET Mr. Vilas held it to be of offensive partisanship for a Republican of foeholder to run a newspaper that was Republican in expression. But it presently dawned upon the Democratic comprehension that this definition, like a two-edged sword, cut both ways, since it stopped Democratic editors from taking office except at the sacrifice of their papers. Besides, it threatened to cut off the enthusiasm of a good many organs. Without newspapers to support it, the Administration would be lacking most material aid. So, Mr. Vilas has modified his definition, and now to be an offensive partisanship does not mean the thing he once defined. It is now held that it does not follow that one is an offensive partisan because he owns, edits or circulates a party paper. But the paper must not be bold and outspoken, and if it is Democratic it is safer. If it abuses Republicans it is safer still, and it may indulge in mild criticisms of Democrats occasionally; but if the editor gets "hot in the collar," and calls a spade a spade, and argues with warmth and vigor for either side, it will be construed as offensive. And to show how sincere he is, Mr. Vilas gives it to be understood that this will apply to any stamp of politics. Divested of all its seeming, this is the cold-blooded logic and true meaning of Mr. Vilas' definition—pretend to be fully insured.

Stones flew in all directions, and men were seen hurrying away with bleeding heads. A number of persons were severely injured, but none died.

The cause of the quarrel was a discussion between the two sides in the camp, and one of those engaged in the fight went up to Sir John A. Macdonald and said he was going to burn Riel's. A number of bystanders shoved the man away, when Sir John said: "I am not the hangman."

Crawfishing has become quite a business on the Oregon rivers. It is no trick at all for a few hundred with half a dozen iron hoppers with bottom set checks to catch three hundred in an afternoon. In the Portland market they sell for two bits a dozen, but in San Francisco they are worth 50 to 75 cents.

A giant was fined \$30 in a Napa County Court recently for some offense, and as soon as he was told of the amount he turned to the Judge and told him that he would like him to settle a delinquent wash bill \$30, and of an officer of the Court standing by he made a similar demand. Its roots, it is estimated, to be two tons of juicy, delicious grapes on the vine, which is 17 years old.

Bears have increased greatly in numbers in Oregon since the great wind-storm of January, 1850, which threw down so much timber, and the animals almost have passed in every part of the state, thus preventing the hunting of bears with dogs.
